

PROFILE

Results-driven Full-Stack Developer with a strong background in React (MUI, TypeScript), Flutter, and Node.js. Passionate about building scalable web and mobile applications, focusing on authentication (OAuth 2.0, Google OAuth), API development, and UI/UX design. Experienced in cloud deployment (VPS, Hostinger), database management (MySQL, Pinecone), and AI integration (Hugging Face, Groq API, Cohere AI). Skilled at producing booking systems, self-appraisal platforms, and interactive dashboards. Collaborative experience with GitHub and the latest front-end frameworks.

EDUCATION

BACHELORS OF TEHNOLOGY
UNIVERSITY SCHOOL OF AUTOMATION AND ROBOTICS
2023-Present

Currently I am in 2nd year, pursuing Bachelors of Technology with the CGPA of 8.34 after the first year. I have a strong foundation in Web Development and App Development and currently in the learning face of AI.

WORK EXPERIENCE

ADVENTROZ- Software Developer
2024-Present

As a Software Developer at ADVENTROZ, I develop web and mobile apps with React, Flutter, and Node.js, implementing Google OAuth and a secure booking system. I optimize UI/UX and manage backend development and MySQL integration.

PROJECTS

TO-DO LIST

It is a java application developed on IntelliJ IDEA software and java-FX library. it includes OOPs concepts and advance concepts like threading, mapping and file handling and you can save the data of the to do list application as a text file or as a pdf format. It also covers xml for developing the UI.

VESPERA-Tech Fest Website

Contributed to developing the Vespera website for the tech fest organized by IOSC and AWS Cloud clubs. Used React.js and Tailwind CSS to implement the layout, event schedules, and real-time updates, ensuring a seamless user experience.
